

Original Designs for

Cosmic Ray Detection

Participation on the frontier of Physics experiments such as MINERvA and DUNE.

International Seminars

International Elementary Particle Laboratory

- Founded in 2005 by Dr. Julián Felix's initiative, has published over **150** articles.
- Planned, designed and built over 43 original prototypes to detect **Cosmic Rays** with innovative **metal-based techniques**.
- Over 30 **Summer research** programs where students engage in a 6-week program to improve their skills and prepare to research and publish properly.
